LEVEL – 1

Organizational Background - Choosing this theme and title for my project was a deeply personal decision, as it reflects a significant part of my upbringing and the passions I've developed over the years. I was raised in an environment where food and catering were more than just businesses, they were a way of life. Surrounded by family members involved in this

industry, I naturally became involved from a young age. I learned the ins and outs of preparing meals, organizing events, and understanding the importance of hospitality. Over time, this exposure grew into a true passion. I found joy in creating dishes, experimenting with flavors, and most importantly, seeing how food could bring people together.

This website reflects that journey. It's designed to be more than just a digital space, this website offers you a list of options, whether you are browsing through to booking a table. You can view from the menu straight from the website, see your chefs and what they are capable of and gain information about our restaurant.

Write-up - Flavor Haven is more than just a website—it's a celebration of food, flavor, and togetherness. Created with passion and purpose, this platform was designed to reflect the joy that comes from cooking, sharing, and enjoying great meals. Whether you're craving a hearty dish, a refreshing beverage, or a sweet dessert, Flavor Haven offers a delightful experience that brings comfort and warmth through every recipe and feature.

Inspired by a lifelong connection to the food and catering industry, Flavor Haven was built to recreate the feeling of home: where laughter fills the air, conversations are shared over meals, and every dish tells a story. Our web page invites visitors to explore an inviting culinary space filled with inspiration, creativity, and mouth-watering content that satisfies both the eyes and the appetite. From classic favorites to exciting new flavors, Flavor Haven is your digital destination for food made with heart.

Wireframe - A wireframe is a basic visual guide that represents the structure and layout of a website. For **Flavor Haven**, a food-focused website centered around warmth, hospitality, and culinary enjoyment,

Design - The **design of the Flavor Haven web page** should reflect warmth, comfort, and a love for food, inviting users into a space that feels cozy yet professional. The web-page is designed to welcome customers into the restaurant, where they feel wanted and appreciated. The website is also designed to give you all the information you need, there are no misunderstandings. The colors of the webpage were chosen to catch the eyes of customers and online views which contains a form of interests.

LEVEL # 2 & 3

This image shows the Home page of the web-page and what the restaurant entails, the home page talks about the restaurant's traditional recipes and its delicacies, the restaurant features a combination of foods and the home page enlists it all.

This image shows the website in progress. The registration process is very simple and requires little time, but all of the information is important and necessary. Booking a table at the restaurant is also very simple and efficient, being prepared is a key rule.
